

# Copper Heart Pin

By Janet Wilhelm for Walnut Hollow®

## Materials:

- Walnut Hollow® 27996 Creative Metal™ Beginner Kit
- Walnut Hollow® Metal Roll, Lt. Aluminum
- Walnut Hollow® Metal Roll, Copper or Copper scraps
- Walnut Hollow® #28016 Metal Tape
- Adhesive Pin Back
- Other supplies: copper wire, small scrap of heavy paper

## Instructions:

1. Use scissors to cut (1) piece of Lt. Aluminum Metal 2 ¾" by 3". Fold in half to make a 2 ¾" x 1 ½" rectangle. Cut out a heart shape from Copper Metal. For extra stability, adhere heart to stiff paper with Metal Tape. Use scissors to cut Tape to fit back of heart. Remove backing from Tape and press heart onto stiff paper. Use scissors to trim paper around heart.
2. Decorate both the Lt. Aluminum and Copper heart using a variety of Interchangeable Points. Attach desired point onto Handle. Place metal on Foam Mat when using Points.
3. Use scissors to cut approximately 20" of copper wire. Unfold Lt. Aluminum and wrap copper wire around front fold of pin. If desired poke wire through the fold line to get some horizontal lines. Cut Metal Tape to fit on back of heart. Remove backing and slip heart between wire wrapping. Press in place. Cut Metal Tape to fit between folded Lt. Aluminum. Remove backing and press together.
4. Attach adhesive pin back on back of metal.
