- [Walnut Hollow® #27996 Creative Metal™ Beginner Set](#)
- [Walnut Hollow® #29661-Red, #29662-Dark Blue, #29663-Pink, #29675-Green, #29676-Gold, #29677-Fuschia, #29678-Light Blue, #29679-Yellow, #29680-Orange Metal Squares](#)
- [Walnut Hollow® Various Design Sheets and Borders](#)
- [Walnut Hollow® #28016 Metal Tape](#)
- Other Supplies: Fine sandpaper, foam brush, paper towel, sanding block, spray varnish, tape, wood stain

Instructions:

Note: Items used below, but not listed in supplies, are included in Beginner Set.

1. To prepare wood for staining, use fine sandpaper to lightly sand wood surface. Remove dust with paper towel.
2. Use foam brush to apply stain to wood. Follow directions for use on container. Remove excess with paper towel. Let dry.
3. Apply 2-3 coats of spray varnish. Let dry.
4. Choose desired Metal Squares. Use scissors to cut (9) 2"x2" squares. Place a Metal Square on desired Design Sheet or Border. Tape in place. Use Texture Tool to emboss design. Remove Metal from Design Sheet. Use various Rollers to create design around edge of square. Attach desired Roller onto Handle. Place Metal on foam mat. Use Roller to decorate edge of Metal. When complete, use sanding block to enhance design. Place square on flat surface and gently rub sanding block over design, removing color from embossed areas.
5. Designs can also be made using various points from Beginner Set. Attach point to Handle. Lay Metal (color side down) on foam mat. Use desired Point to create doodles, draw designs, trace stencils, etc. Be creative. Use sanding block as noted above.
6. To attach squares to wood, use Metal Tape. Use scissors to cut strips of Tape to fit back of squares. Press sticky side of Tape to square. Remove protective backing and press onto wood. Continue until all squares are attached.
