

Paper with Metal Bookmark

By Janet Wilhelm for Walnut Hollow®

Materials:

- [Walnut Hollow® #27996 Creative Metal™ Beginner Kit](#)
- [Walnut Hollow® #28076 Design Borders A](#)
- [Walnut Hollow® #28016 Metal Tape](#)
- [Walnut Hollow® Brass Metal Roll](#)
- (2) sheets of decorative paper, (1) sheet of plain, color coordinating, cardstock
- Yarn to coordinate with paper
- Antique Medium
- Other Supplies: craft glue, paper towel, paper punch, sandpaper, small sponge or brush, tape

Instructions:

1. Use scissors to cut two rectangles, 2"x7". Use craft glue to adhere two rectangles together with decorative sides of paper visible front and back.
2. Use scissors to cut a rectangle from Brass Metal Roll approximately 6 ¼"x1 ¼". Place cut metal on Design Border. Tape in place. Use the Texture Tool to rub over Design Border to reveal the image. Continue pressing into the grooves until the entire design is visible. Remove metal from Border Design. Place metal on foam mat. To add a decorative edge to rectangle, attach desired medium roller onto Handle. Using the metal ruler as guide, pull roller along edges of metal. Remove metal from foam mat.
3. Use small sponge or brush to apply antique medium to front of metal. Remove excess with paper towel. Let dry. Use sandpaper to lightly sand metal to highlight design.
4. Use scissors to cut a rectangle from cardstock 6 ½"x1 ½". Adhere metal to cardstock using Metal Tape. Cut tape to fit back of metal along edges. Remove backing from tape. Lay metal on cardstock and press in place. Use craft glue to adhere cardstock to decorative paper. Refer to photo for placement.
5. Use paper punch to create a hole in top center. Cut two or three pieces of yarn approximately 7" long. Fold yarn in half. Push folded end through hole. Pull loose ends through folded loop and pull to tighten. Trim ends of yarn to desired length.
